linear integrated circuits home
pdf - An integrated circuit or
monolithic integrated circuit (also
referred to as an IC, a chip, or a
microchip) is a set of electronic
circuits on one small flat piece (or
"chip") of semiconductor
material, normally silicon. The
integration of large numbers of
tiny transistors into a small chip
results in circuits that are orders
of magnitude smaller, cheaper,
and faster than those constructed

microelectronics, a
three-dimensional integrated
circuit (3D IC) is an integrated
circuit manufactured by stacking
silicon wafers or dies and
interconnecting them vertically
using, for instance,
through-silicon vias (TSVs) or
Cu-Cu connections, so that they
behave as a single device to
achieve performance
improvements at reduced power
and smaller footprint than
conventional two dimensional ...

Microchip Technology Inc. is a
leading provider of
microcontroller, mixed-signal,
analog and Flash-IP solutions,
providing low-risk product
development, lower total system
cost and faster time to market for
thousands of diverse customer
applications worldwide.
Microchip offers outstanding
technical support along with
dependable delivery and quality.

Electronics Corp. - PASSIVE
FILTER VS. ACTIVE FILTER
Definitions A passive filter is a
kind of electronic filter that is
made only from passive elements
â€œ in contrast to an active filter,
it does not require an external
power source (beyond the signal).
An active filter is a type of analog
electronic filter, distinguished by
the use of one or more active
components and require an
external power source. PASSIVE
FILTER VS. ACTIVE FILTER -
